RSL-II - Science Lab Renovations

Renovations to chemistry and physics labs

U.W. Marx has been contracted by **Brookhaven National Laboratories, a U.S. Department of Energy contractor**, to renovate approximately 89,000 s/f of laboratories, offices, and support space within the chemistry building and the physics building on the 5,300-acre Brookhaven campus in Upton, NY.

The project scope of work includes installation of air-handling systems that are more reliable and energy-efficient with improved temperature and humidity control in both buildings. HEPA filters will be provided for nanoscience research, and updated electrical power will be installed for better functioning of sensitive research equipment. Both buildings will be renovated to meet the standards for **LEED Silver certification** for commercial interiors by the **U.S. Green Building Council**.

Scope of renovations at the physics lab will include updating a three-story laboratory and office wing, refurbishing a seminar room, and constructing high-quality clean rooms, needed for building and testing detector components.

PROJECT HIGHLIGHTS

- U.W. Marx: General Contractor/Constructor
- 89,000 s/f laboratory, office and seminar rooms renovations
- Project will be constructed to US Green Building Council guidelines for potential LEED® Silver certification
