## Rensselaer Train Station New Parking Structure

*New 3-Level, 897-space parking garage*

U.W. Marx constructed this new 897-space parking garage for the **Capital District Transportation Authority** as part of the new CDTA Rensselaer Train Station project in Rensselaer, NY.

Completed in 2002, the parking structure features a steel H pile foundation and precast concrete superstructure.

Designed by **Stracher Roth Gilmore Architects** of Schenectady, NY the first and second levels of the structure accommodate long-term public parking, while the third-level parking plaza provides a number of short-term parking spaces for travelers to and from New York's Tech Valley.

### PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- 897 vehicle spaces
- 3 levels
