## Project Size

80,000 s/f

## Project Architect

Stracher Roth Gilmore Architects  
143 Jay Street  
Schenectady, NY 12305

## New Rensselaer Train Station

*New intermodal transportation center*

U.W. Marx served as construction manager for the award-winning new **Rensselaer Rail Station** for the **Capital District Transportation Authority**.

Features of the new 80,000 s/f rail facility include glass skylights, climate-controlled access to the tracks, and top floor dedicated to retail and commercial space overlooking the main lobby.

The project included a new 3-level, 897-space parking facility in addition to track and rail bed improvements, a pedestrian bridge, and a highway bridge connecting the station to downtown Rensselaer.

Construction of the new station extended a tradition of continuous train service from this location that was begun in 1831.
