EXCEL Capital Project 2007-9

Multi-phased upgrades and improvements

The **Granville Central School District's EXCEL Capital Project 2007-9** included additions and renovations at the District's Jr/Sr. High School, Granville Elementary School and Mary J. Tanner Elementary School.

The project was divided into three unique phases in order to minimize interference with ongoing activities at the school buildings.

The project's scope of work included security updates, ADA and traffic flow safety upgrades, an addition containing multiple new classrooms, upgrades to the school's library & media center, electrical system upgrades, data and technology upgrades, and construction of a new nurses suite.

"Having served as the Superintendent for the Granville Central School District from 2004 - 2009, I had an opportunity to be part of the selection process for a Construction Management Company for the \$18.55 million EXCEL Building Project.

Your insight and construction knowledge set U.W. Marx miles ahead of your competition...having the opportunity to work directly with U. W. Marx and your site construction manager, Mr. Marc Rivers, I would without a doubt hire, or recommend your company, for any type of construction projects in the future."

Mr. Daniel Teplesky, Superintendent of Schools
Ravena-Coeymans-Selkirk Central School District

PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- Multi-phased Project
- New classrooms, new nurses suite
- Library & media center upgrades
