## Halfmoon Water System

### *Water source improvements & new water treatment plant*

U.W. Marx teamed with engineering firm Clough, Harbour & Associates, LLP and more than 50 subcontractors to build this award-winning water treatment plant for the **Town of Halfmoon, NY**.

New construction at the site consisted of a 13,050 s/f treatment plant, a 1,575 s/f office building, and a 10 million gallon-per-day pumping station on the shore of the Hudson River.

The facility is currently licensed by New York State to produce 2 million gallons of high-quality drinking water per day, but was designed and constructed to allow for a doubling of the plant's capacity to meet the growing community's water needs.

Completed in the summer of 2003, the fast-tracked project was delivered under budget, receiving a **'Best of 2003 Award of Merit: Environmental Category'** from New York Construction News.

#### **PROJECT HIGHLIGHTS**

- U.W. Marx: General Contractor/Constructor
- 2 mgd design capacity/expandable to 4 mgd
- Best of 2003 **Award of Merit: Environmental Category, NY Construction News**
- 13,050 s/f treatment plant
- 10 mgd pumping station on shore of Hudson River
