New Orthopedic Operating Rooms & New Post-Anesthesia Care Unit

Vertical expansion and renovations

U.W. Marx Construction Company served as Construction Manager for **Master Facility Plan Phase I** associated with the merger and consolidation of services of **The Kingston Hospital and Benedictine Hospital** forming **HealthAlliance of the Hudson Valley™**.

The successful **Orthopedic Operating Rooms & PACU Renovation** project at **Benedictine Hospital** involved a third floor vertical expansion for two new state-of-the-art Orthopedic Operating Room suites, as well as significant renovations for a new post-anesthesia care unit.

This challenging project required careful coordination to minimize disruption to the existing Operating Room immediately adjacent to the expansion and the imaging department immediately below.

PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- 3rd floor vertical expansion at active hospital
- 2 new state-of-the-art Orthopedic ORs
- New Post-Anesthesia Care Unit
- Complex coordination required due to nearby operating room and imaging department
