## New Emergency Department

### *Addition and renovations project*

U.W. Marx constructed a new 12,000 s/f emergency department wing at **The Kingston Hospital**. The fast-tracked project included construction of a new ambulance entrance and hospital main entrance and lobby, and a complete renovation of the existing adjacent emergency department.

New construction & renovations provided for a new central nurse control station surrounded by 15 new private treatment rooms, 2 isolation rooms, 3 trauma rooms, a cardio treatment room, and associated support spaces.

All work was conducted on the active hospital campus, with minimal disturbance to ongoing operations.

### PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- 15 New Treatment Rooms
- 2 New Isolation Rooms
- New Cardio Treatment Room
