National Museum of Racing & Hall of Fame

Award-winning addition & renovations project

U.W. Marx constructed a new 10,000 s/f addition around the existing **National Museum of Racing & Hall of Fame** while it remained fully operational, and then renovated an additional 28,000 s/f of space during a winter/spring shutdown.

The award-winning project included installation of a complete new heating, A/C, humidification and temperature control system, new exhibit space and new entryways, main lobby, and gift shop. Existing dormant space was converted into collections-storage with state-of-the-art climate-control capabilities.

The project was recognized as a **CMAA 2001 Project of the Year** by the Construction Management Association of America, NY-NJ Metro Chapter.

"The project was an important undertaking by the Museum. It involved not only the addition of new exhibition and collection storage space, but also the renovation to virtually all of our existing facility...our new exhibition facility, which was designed to maintain an extremely stable museum climate, had to be completed in advance of the actual public opening, so that we could prove that it was safe to display approximately \$300,000,000 worth of borrowed paintings."

Peter H. Hammell, Director
National Museum of Racing & Hall of Fame

PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- Multi-phased project, completed on schedule
- State-of-the-art climate control systems
- **CMAA 2001 Project of the Year, NY/NJ Chapter**
