New Page AvJet Air Terminal

New executive aircraft facility

This project called for new construction of a modern executive aircraft facility for the **Page AvJet Corporation** at **Albany International Airport** in Albany, NY.

The client hired U.W. Marx Construction Company to build a facility that would enable the company to meet its goal of providing top-tier services to its upscale customer base.

The 45,000 s/f structure, including aircraft hangar, passenger and administrative space, required intensive attention to detail to meet the needs of the owner, and was constructed under a rigorous schedule.

U.W. Marx helped project architect Crozier Associates, P.C. of Albany and Page AvJet bring their project in under budget by pursuing intensive value engineering efforts during the preconstruction and construction phases.

PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- Constructed at an active airport under strict guidelines
- Aggressive project schedule
- Delivered to client below original budget estimates
