Wastewater Treatment Plant

New .26mgd wastewater treatment facility

U.W. Marx's general contracting division constructed the **Town of Pownal's new Wastewater Treatment Facility**, built adjacent to the former Pownal Tannery Superfund site in North Pownal.

The new 0.26 mgd facility, designed by engineering firm Forcier, Aldrich and Associates of Essex Junction, VT, features an SBR System with fine bubble aeration (2 units), UV disinfection, PLC w/alarm dialer/notification system, and a computer workstation w/SCADA system and remote access.

Despite difficult working conditions caused by drenching spring and early summer rains in 2006, the U.W. Marx team completed work ahead of schedule.

PROJECT HIGHLIGHTS

- U.W. Marx: General Contractor/Constructor
- .26 million gallons per day capacity facility
- SBR system with fine bubble aeration
- UV disinfection system
- PLC w/alarm dialer/notification
- Computer workstation with SCADA system and remote access
- Work completed ahead of schedule
