St. Peter's Cancer Care Center

Addition and renovations project

U.W. Marx Construction Company provided construction management services to **St. Peter's Hospital** for the hospital's **Cancer Care Center Addition & Renovations** project.

The 12,000 s/f renovation portion of the project was completed in five phases with each phase being completed while the remaining facility remained fully operational. Daily coordination with staff with regard to staging of material and tools in the project phase, routing patient traffic safely in and out of the center, and timing of excessive noise-generating activities was critical. With highly compromised patients on the other side of construction barriers in all phases, infection control and dust protection were of paramount importance.

The 3,000 s/f addition included installation of a new CT Simulator and a new Varian Linear Accelerator.

PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- 12,000 s/f renovations
- 3,000 s/f addition
- Multi-phased project conducted while cancer care services remained fully operational
