New 5th Avenue Parking Garage

New 3-Level, 316-space parking structure

U.W. Marx Construction Company served as construction manager on this project, providing the **City of Troy**, NY with the new **5th Avenue Parking Garage**.

The new 316-space parking structure is located on Fifth Avenue between Broadway and State Street, and complements the 18th- and 19th-century architecture prevalent in downtown Troy.

The garage is a three-level structure, consisting of a steel frame and composite concrete decking. Designed by Envision Architects of Albany, NY, the facility features a pre-cast structure with an historically-appropriate brick façade.

Constructing the new parking structure on a tight site in a busy urban area provided unique challenges to the construction team.

PROJECT HIGHLIGHTS

- U.W. Marx: Construction Manager
- 316-space, 3-level structure
- Constructed on a tight site in a busy urban area
